1	0206-9/7	Supply of soil monitoring stations	Agreement for the Purchase of Equipment	The purpose of this Procurement Contract is the supply, delivery, and installation of two soil monitoring stations at two locations within the territory of the Republic of North Macedonia, including all necessary components, accessories, and associated equipment. The stations are intended to enable the systematic monitoring and assessment of soil conditions over time, generating reliable and accurate data to support the establishment of a Decision Support System (DSS) for sustainable land management and environmental protection. The Contract also includes the provision of training for the end users of the soil monitoring stations. The training shall cover data collection procedures, basic operation and maintenance requirements, and the use of the accompanying software. Its objective is to ensure the effective, efficient, and sustainable operation of the equipment, as well as the proper use and long-term functionality of the soil monitoring system	SIMT DOOEL export - import Skopje	4 000	21.01.2026	The delivery has been successfully completed, and the Contract is now in the warranty period
